- 2+ year of professional experience developing WEB-based solutions (JSP 2.0)
- 2+ year of professional experience with enterprise-level SQL backend (MSSQL or Oracle)
- Experience with the Spring and Hibernate frameworks (experience with WebLogic is a plus)
- Ability to conduct Object Oriented Analysis
- Ability to create and implement Data Model designs
- Good knowledge of (X)HTML, JavaScript, CSS
- Basic knowledge of XML and Web Services

**The following skills will be an advantage**

- Experience with C#/.NET
- Knowledge of project management methodology & tools
- Knowledge of bug tracking methodology & tools
- Experience in preparing technical documentation
- Experience with CMS systems

**We offer**

- The opportunity to work on challenging projects
- Possibilities for career development in international company
- Open and friendly working atmosphere
- Joining bonus (equal to an additional first months' salary)
- 25 days of paid holidays
- Flexible working time

**To apply**
